

DYNAMIC HEAD MOBILE SPECIFICATIONS

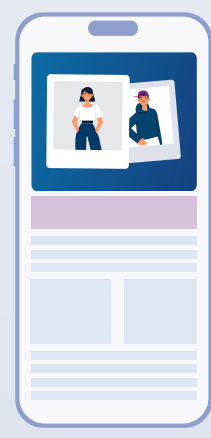

DESCRIPTION

The Dynamic Head Mobile is displayed in the upper area of the website. It consists of two elements: the start element (image or animation) and the sticky element (image, animation or video). When scrolling down, the start element is pushed up by the sticky element. The two elements enable an optimal combination of image, animation and video on a mobile device.

POSITIONING AND BEHAVIOUR

*When delivering banners, exclude click tags and set the AD Environment in Google Web Designer to Non-Google Ad to avoid loading unnecessary libraries and slowdowns.

**Do not place any graphic element on the top right corner (60x60px) of Sticky Element since it will be covered by the close button.

Or contact us directly and we will help you create images and animations.
