

Kadir Yilmaz

Full-Stack Engineer | SaaS Builder

📍 Remote (Turkey) ✉ hey@kadirhan.dev 🌐 <https://kadirhan.dev> [in](#) [LinkedIn](#) [Github](#)

📄 SUMMARY

Full-Stack Engineer who builds and ships AI-powered SaaS products end-to-end, from the first line of code to the first paying user.

Founder of QuickStaging, a marketing suite for real estate agents, built and shipped independently with Next.js and AI integration.

3+ years of production experience across React, Next.js, and Node, with hands-on experience integrating LLM and image-generation APIs into real products. I own the full stack, move fast, and care about distribution and users as much as code.

📁 EXPERIENCE

QuickStaging

Remote

Founder & Full-Stack Engineer

February 2026 - Present

- Built and shipped a production AI SaaS for real-estate virtual staging as a solo founder: Next.js, MongoDB, AI image-generation pipeline, authentication, billing, and a credit-based usage system.
- Integrated LLM and image-generation APIs (Google Gemini) to power the core staging feature; designed the generation flow, prompt logic, per-user credit limits, and free-tier abuse mitigation.
- Built programmatic SEO infrastructure for a multi-language site with 1,000+ pages, and ran cold-outreach campaigns to acquire the first paying customers.
- Owned the product loop end-to-end, including onboarding, free-trial credits, and conversion, while learning distribution and sales alongside engineering.

Toprak Rehberi

Istanbul, Turkey (Remote)

Front-end Developer

October 2024 - March 2026

- Built and shipped front-end features for web and CRM products using Nuxt.js, with a focus on UI development, performance optimization, and maintainability.
- Developed reusable UI components and modules that improved delivery speed across the platform.
- Improved the performance and UX of existing pages and workflows through targeted optimizations.

ANDRE.ai

Geneva, Switzerland (Remote)

Front-end Developer (Contract, Part-time)

July 2024 - June 2025

- Integrated front-end interfaces with backend systems via REST APIs for an automated storytelling engine, enabling real-time data flow.
- Designed and implemented advanced chart-rendering logic in Next.js, improving page-load performance while working part-time alongside a full-time role.

Naylalabs

Samsun, Turkey

Front-end Developer

December 2022 - March 2024

- Delivered CMS, CRM, and SaaS solutions for diverse clients while meeting deadlines through agile, cross-functional collaboration.
- Engineered reusable UI components with React and SCSS, accelerating development and ensuring brand consistency across projects.

Global Media

Samsun, Turkey

Front-end Developer

April 2022 - December 2022

- Built lightweight CRM tools that digitized manual workflows and reduced administrative data-entry effort.

<> PROJECTS

Tekliflesat | Nuxt.js

Land-trading marketplace built with Nuxt.js, featuring offer-management workflows.

Onboarding App | MERN Stack (MongoDB, Express, React, Node)

Full-stack employee-management system with role-based workflows that automate HR onboarding.

Workwear360 | Next.js, Functional Programming

Global laundry-logistics platform built in Next.js with functional programming, multi-language support, and a scalable UI structure.

Promptuner | Chrome Extension

Chrome extension for improving LLM prompts.

🧑 SKILLS

Languages

JavaScript, TypeScript, Python

Frontend

React, Next.js, Vue.js, Nuxt.js, Angular, HTML5, CSS3/SCSS, Tailwind CSS

Backend

Node.js, Express.js, NestJS, REST APIs, MongoDB, Supabase, PostgreSQL

Practices

Clean and modular architecture, multi-tenant SaaS architecture, Agile/Scrum, Git, JIRA

AI / ML

LLM and AI API integration, prompt engineering, diffusion/image-generation pipelines (FLUX, ControlNet), segmentation and depth models (SAM, Depth Anything)

🗣️ LANGUAGES

English

Professional Proficiency

Turkish

Native

🎯 INTERESTS

Independent product development, micro-SaaS, building in public, and AI-driven workflows that automate and scale digital products.

Backpacking, solo travel, minimalist travel, and cultural immersion.

🎓 EDUCATION

Eskisehir Osmangazi University

Environmental Protection and Control

Associate Degree

Eskisehir, Turkey • 2025 - present
