INTEGRATIONS

KEY OUTCOMES

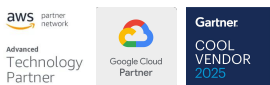

- DevOps Team Productivity**
Automate routine tasks, reduce tool switching, and context loss by integrating all DevOps tools into one intelligent interface.
- Boost DevOps Velocity**
Improve DORA metrics with AI-powered insights and actions.
- Reduced MTTR**
Get instant root cause analysis, automated remediation steps, and clear action plans.
- Continuous Improvement**
Trains on your unique environment to deliver increasingly accurate insights and recommendations over time.

HOW IT WORKS

- 1. Connect Your Stack**
Integrates with your Engineering tools such as Observability, CI/CD, Databases, Cloud Infrastructure or Kubernetes clusters.
- 3. Investigate**
Aiden correlates data, identifies the cause, and either resolves it or guides you to resolution.
- 2. Ask or Automate**
Query in plain English or configure Aiden to execute automated Tasks.
- 4. Learn and Improve**
Captures knowledge to make the next query result even faster.

CORE CAPABILITIES

Capabilities	What	Prompt
Agentic Operations	Can perform native integration capabilities based across multiple Integrations	“Provision IaC for my new service, create PR, and CI/CD pipeline”
Contextual Insights	Leveraging Aiden’s Knowledge Base to return contextual summaries of any query	“Why is my service down in AWS US-East region”
Automated AI Workflows	Executes a chain of actions triggered based on events, schedule or more	“When these type of Alerts occur do this”
