

App Developers

Focus creating business or user critical features

StackGen

Nielsen

inMOBI

SAP NS2

CHAMBERLAIN

AUTODESK

Lexmark

95%

Reduction in Provisioning Time

80%

Fewer Platform Support Tickets

60%

Faster deployment velocity

Key Outcomes

Consistent & Predictable Environments

99% parity between dev, staging, and production environments.

Improved Developer Productivity

30–40% increase in productive coding time by reducing manual infra setup and troubleshooting.

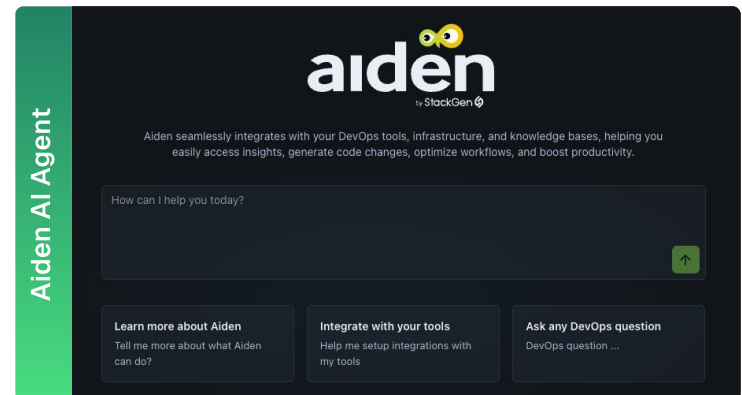

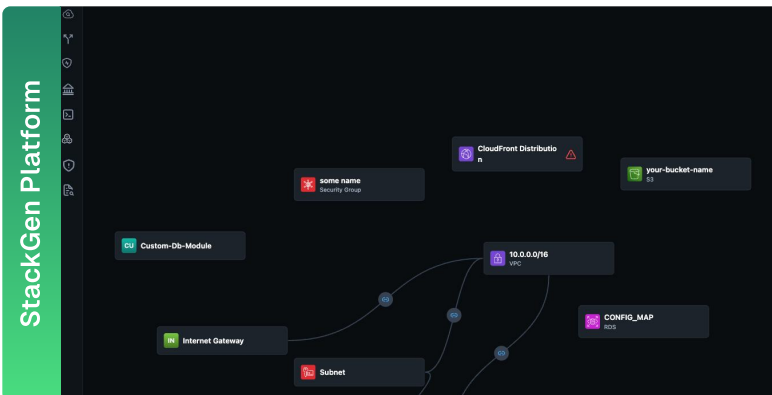

Accelerated Deployment Velocity

App release cycles speed up by **40–60%**, as environments and stacks can be spun up instantly.

Fewer Deployment Failures

Up to 50% reduction in failed deployments due to automated validation and policy enforcement.

Integrations & Tools

TOOLS

WHAT

appStacks

Define and deploy your app's architecture with auto-generated IaC from appStacks

Cloud Discovery

Import Terraform state files to discover and map existing cloud resources

Policies

Auto-use pre-defined built-in and custom policies

Governance Configs

Auto-use pre-built or predefined governance config sets based on Project level config

Modules

Use pre-built or custom modules that's pre-approved by Platform team

CAPABILITIES

WHAT

Generate IaC

Aiden takes natural language prompt and creates infrastructure appStack

Auto Discovery

Aiden can discover cloud resources from Terraform state files

Auto-enforce policies

Aiden leverages StackGen tools to apply relevant policies to appStacks

Auto-enforce governance configs

Aiden applies governance config defined by Platform team based on app intent

Auto-enforce modules

Aiden leverages relevant predefined modules by Platform team based on app intent
