

Tenable One OT Exposure

Health Check

Improve Your OT/ICS Security Program with a
Tenable One Identity Exposure Health Check

A service engagement with Tenable® Professional Services helps optimize your solution implementation so you can see, predict and act on cyber risk to your business.

Today's rapidly converging Operational Technology (OT) and Information Technology (IT) infrastructure, plus an increase in cyber threats are challenging organizations like never before to achieve complete visibility into their assets and strengthen their Vulnerability Management (VM) programs. It is crucial to ensure the effectiveness of OT and Industrial Control System (ICS) security programs in order to minimize the risks of high-impact vulnerabilities and misconfigurations.

A Tenable Health Check will assess the performance of your current industrial security program operations, identify gaps and recommend mitigation techniques to maximize the effectiveness of your Tenable One OT Exposure solution. Efficiently identifying your assets and assessing their risks will enable your organization to make more effective, business-focused decisions.

The Tenable Professional Services team and our global network of certified partners provide advice on product optimization and industry best practices. Their experience has been gained from years of hands-on experience with thousands of customers world-wide.

Service Outcomes

- **Assess your OT security program**
Find out how to improve the coverage and effectiveness of your current vulnerability management program.
- **Adhere to best practices**
Our consultants will adhere to known best practices and apply proven Tenable® methodology at every step.
- **Integrate tools with our solutions**
Increase efficiency by leveraging the many available options for integrating with Tenable solutions
- **Maintain your deployment**
We will share knowledge and create documentation to help keep your deployment in its most effective state.

Key Benefits

- **Thorough Planning and Assessment**

Our remote or onsite engagement options are multi-phased service offerings designed to enhance your Tenable deployment.

First, we will work with you to determine the scope of your implementation, based on your operational environment specifics and unique industrial security challenges and goals.

Then, we conduct a high-level review and assessment to analyze your current solution performance, assess resource usage, identify configuration issues and evaluate the overall efficiency of your OT/ICS security operations, while noting areas for improvement.

- **Rigorous Solution Review and Implementation**

Our consultants will provide guidance and direction while sharing our industry knowledge and best practices regarding solution implementation, security data analysis and reporting. We will work with you to fine-tune many aspects of your solution in order to optimize your OT/ICS security program.

- **Comprehensive Solution Documentation**

Tenable can integrate Tenable One OT Exposure with Tenable One, Tenable Vulnerability Management or Tenable Security Center to give you a unified risk-based view across your converged infrastructure.

- **Supporting your Growth**

Organizations change and develop over time. Tenable Professional Services can help ensure your solution stays aligned to your evolving business requirements.

- **Experienced Professional Services Team**

Tenable Professional Services' goal is to implement our products to solve your most pressing security problems, enabling your organization to see, predict and act on cyber risks. To accomplish this, we capitalize on our combined years of industry experience to tackle even the most challenging requirements.

By engaging Tenable Professional Services, you can realize the value of your Tenable investment more quickly to feel confident you are on the right path for RBVM program maturity. We have a broad portfolio of services and training available worldwide, remotely or on-site, to meet your specific needs.

About Tenable

Tenable is the exposure management company, exposing and closing the cybersecurity gaps that erode business value, reputation and trust. The company's AI-powered [exposure management platform](#) radically unifies security visibility, insight and action across the attack surface, equipping modern organizations to protect against attacks from IT infrastructure to cloud environments to critical infrastructure and everywhere in between. By protecting enterprises from security exposure, Tenable reduces business risk for over 40,000 customers around the globe. Learn more at tenable.com.
