# Message from the Editor-in-Chief

*Cancers* is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## **Aims**

*Cancers* features (1) Original Articles reporting on novel and original findings; (2) Clinical Observations accompanied by analysis and discussion; (3) Communications reporting small scale studies that include important new information; (4) Timely Reviews and Topical Issues on cutting edge fields in oncology. In addition, we accept well-designed studies showing meaningful but negative results. By doing this, we encourage scientists to share those data so that they would not need to repeat the experiments that somebody else has already done.
