

BLUEcloud Central

Take control of your library or system with BLUEcloud Central. Through a single login, you can launch and manage all of your BLUEcloud products from one place, saving administrative headaches and boosting productivity.

Manage your library anywhere

With BLUEcloud Central's HTML5 interface, you can complete administrative tasks wherever you are, on your mobile device, laptop, or tablet.

Everything in one place

Manage all your BLUEcloud products in one cloud-based interface. Through a central, customizable dashboard, you can easily tailor your library system to the unique needs of your users and staff.

“We have a fairly complex consortium environment and hierarchy in SWIFT, and [BLUEcloud Central] has the flexibility to build that hierarchy.”

Lloyd Brady | SWIFT Consortium | Australia

The right tools for every library

Whether you run a consortium or a single library, BLUEcloud Central adapts to fit your needs. No matter the size of your library, you can easily view and manage institutional hierarchies, create user privileges, or update settings for your discovery tools.

The screenshot displays the 'Institution Groups' management page. On the left, a table lists existing groups:

Institution Group Name	Description	Owner
Madison School District	MSD- All Collections	Hub North
Fremont Special Collections	Collection of manuscripts fr...	Hub South
Willow Free Public Library	General Fiction Collection	Hub West

On the right, the 'Create' form is shown with the following fields:

- Institution Group Name ***: Madison School District
- Description**: MSD- All Collections
- Owner**: Hub North
- Usable by:** A table listing users and their primary institutions:

Name	Primary Institution
Jon Doe	Hub West
Sam Smith	Hub West
Janey Wu	Hub West

At the bottom of the form, there is a checkbox for 'Hub North' which is checked.

Features

- The ability to create unlimited numbers of parent and child sites to support any library system
- Support for lateral resource sharing groups across any sites in a consortium
- Detailed permissions options for each group, site, staff role, and BLUEcloud app
- Call number browsing
- Industry-leading indexing, using Apache Hadoop and MapReduce to process large data sets quickly
- Delivered system text in English and French, with more language options on the way
- Direct access to monthly release notes from the Help Menu
