

Termzy AI

Understanding online contracts should not require **a law degree.**

AI-powered browser extension that instantly analyzes Privacy Policies and Terms & Conditions before users click "Accept".

The Problem

95%

Most users accept legal agreements without reading them — despite being legally binding.

Termzy AI

- Legal documents intentionally long, vague, unreadable.
- Platforms exploit low attentiveness to harvest data.
- GDPR exists, but transparency remains inaccessible.
- “Lack of attentiveness by design” – not user error.

They define your **data lifecycle**

1

Collection

Clicks, location, behavior, device info.

2

Handling

Storage, processing, security.

3

Third Parties

Who receives your information.

4

AI & Selling

Data for AI training or monetization.

They define your **rights & limits**

1

Liability

What companies are/are not responsible for.

2

Payments

Refunds, renewals, disputes.

3

User Behaviour

Permitted and prohibited actions.

4

Ownership

Uploaded content and generated data.

The Paradox

People carefully review a 2-page contract sent by email — yet accept 100-page agreements from Big Tech without reading a single line.

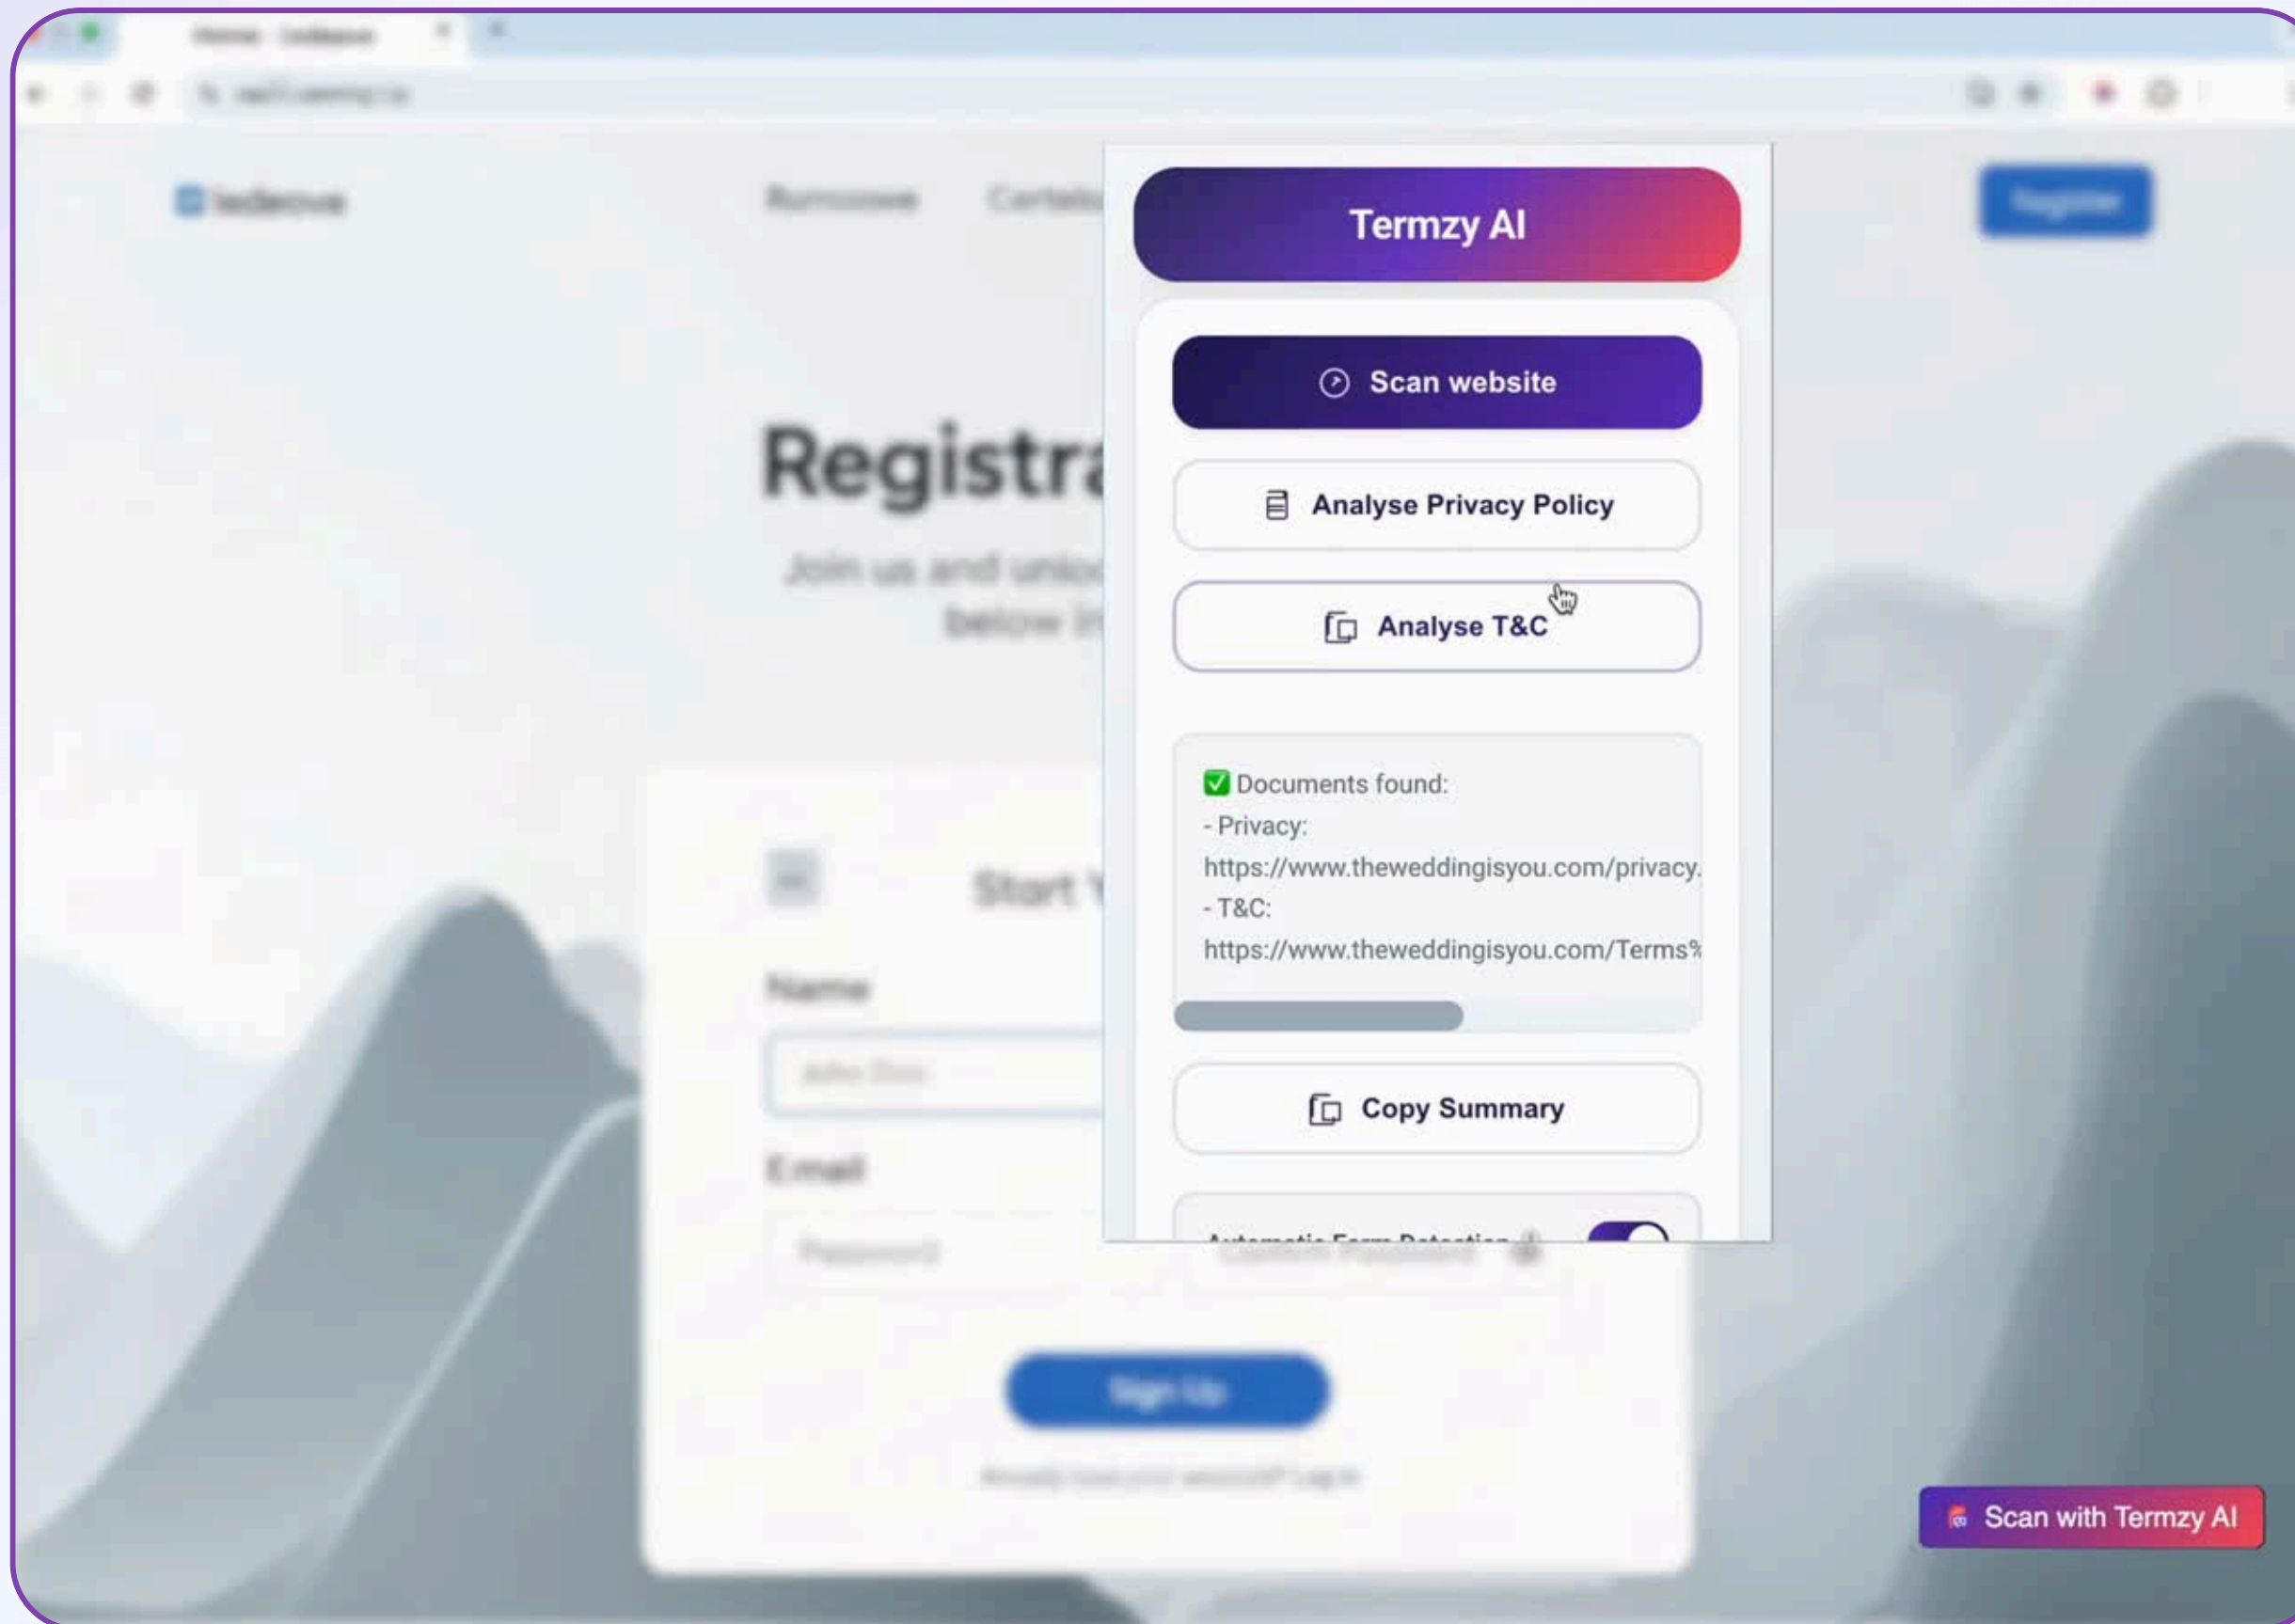

This contradiction is structural, not accidental.

The Solution

Instant AI analysis before users hit **"Accept"**

- Automatically detects legal documents on websites.
- Summarizes risks and key clauses instantly.
- Evaluates fairness, transparency, data usage and legal compliance.
- Transforms unreadable legal text into clear insights.

Market Opportunity

Positioned at the intersection of **multiple** large markets

Contract Lifecycle Management

\$1.3B

TAM · Led by DocuSign, Ironclad

Consumer-facing agreement intelligence

Privacy Certification

\$500M

TAM · TRUSTe, Norton Safe Web

Verified transparency & trust badges

Termzy AI bridges consumer contract analysis with privacy certification – a unique dual revenue pathway.

Termzy AI

Mission

Make online contracts **understandable** for everyone

Empower all internet users — not only those with legal expertise — to understand what they agree to.

- Reduce information asymmetry between users and platforms.
- Push companies toward balanced digital agreements.
- Aligned with UN SDG 10 and SDG 12.

Giulio Pavesi

Founder, Termzy AI

Founder of AI-based digital products.
Double degree in Communication Science and
"Human & AI" at the University of Amsterdam.
