Welcome to our Cambridge Core catalogue for librarians

Find out more about Cambridge Core and our products and collections, as well as an overview of available purchase models.

Since launch the key developments deployed on the platform have been:

Implementation of Inbound OpenURLs

COUNTER 5 reports

Accessibility improvements across the site, with regular auditing to ensure we remain compliant

Improved MARC Records and KBART lists

Cambridge Core Share – the responsible social sharing tool for researchers and academics

Improved HTML content on landing page experience for all content

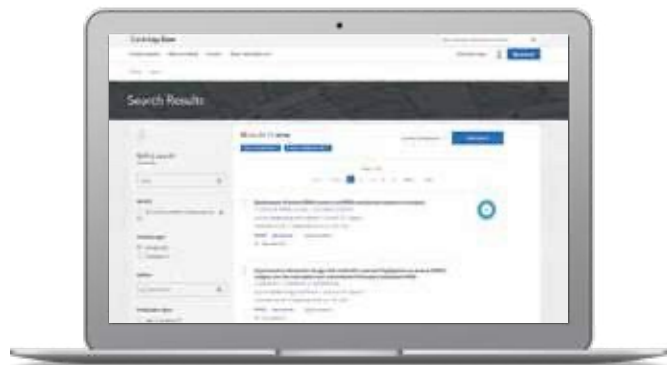

Cambridge Core hosts:

400+ Journals

44,000+ ebooks

Key features

In addition to the functionality highlighted, Cambridge Core also offers a variety of important tools for librarians including:

Reporting

Download your ebook and journal reports in one convenient location

Turnaway reports

Turnaway reports are captured and retrievable through your administrator Cambridge Core account, or are available on request

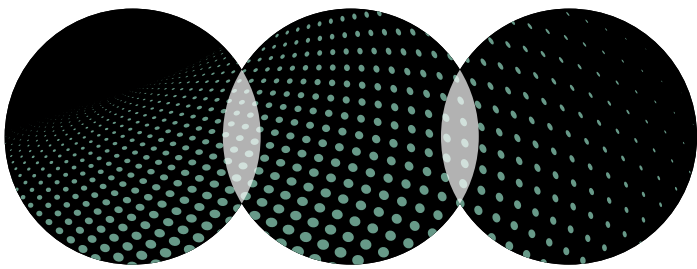

Accessibility

Cambridge Core is committed to providing a platform that is accessible to the widest possible audience, regardless of technology or ability, and received DAC Accessible AA accreditation in February 2022

Security

Cambridge Core is secure and includes the functionality to protect customers' data

Open research from Cambridge

Together, we are building an open future. The reach and impact of open research inspires discovery, sparks enquiry and aids understanding of global challenges. It is at the heart of delivering our mission and that of our University. The need for increased access, reach, and influence inspires us to work with you, embracing new solutions to unlock the potential of research through greater collaboration, transparency, and accessibility.

Cambridge Open Access

Open access has become an important way to make research findings freely available for anyone to access and view. We support both gold and green OA in our books and journals programme.

- In 2021, 35 per cent of the journal research articles we published were open access
- Open access agreements at more than 2,300 institutions in over 30 countries
- We have published over 150 open access books

We are transforming the vast majority of research publishing in our journals to open access by 2025; accelerating the publication of early research; finding new ways to publish books open access; and pioneering new publishing models and policies.

[cambridge.org/openaccess](https://www.cambridge.org/openaccess)

Cambridge Open Engage

Cambridge Open Engage is the early content platform from Cambridge University Press, providing the space and resources for researchers to connect, collaborate, and rapidly disseminate early research. The platform hosts early research outputs, such as preprints, conference posters and proceedings, open data, and grey literature, as well as other types of open content.

[cambridge.org/engage](https://www.cambridge.org/engage)

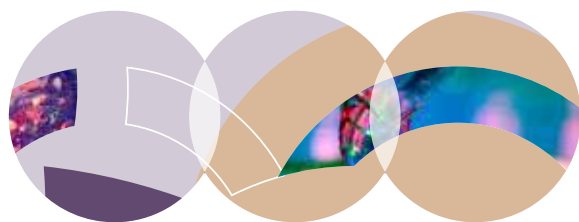

Cambridge Core Share

Cambridge Core Share is our article sharing service, enabling authors and readers to easily generate a link to an online, read-only journal article. This link can be shared online to allow anyone to read the final published version of the article without a paywall or other barrier.

Purchase models

Ebook and journal purchasing models on Cambridge Core

Ebook purchasing models

Evidence Based Acquisition (EBA)

Under an Evidence Based Acquisition (EBA) model, institutions are given access to an extensive online collection of ebooks from Cambridge University Press and our publishing partners, before they decide which ebooks to purchase in perpetuity. We supply title list and catalogue-enhanced MARC records before the start of the EBA and update them at the beginning of each month. The evidence to support decision making is supplied in the form of usage reports, indicating which titles are the most popular within the institution during the period.

Subject Collection Building

Subject collections are available on Cambridge Core, covering more than 30 areas of study. Collections can be customised according to your subject interest. Also available are our Hot Topics, a series of bespoke ebook collections which span across a range of subjects to reflect the latest research trends.

Cambridge Frontlist

Advance Ordering is available for forthcoming titles. You can either purchase the complete list of our forthcoming new titles or you can specify custom subject areas with titles being acquired automatically as they become available (see page 5 for more details).

Pick-and-choose

All ebooks on Cambridge Core can be purchased on a title-by-title basis, to enable you to buy titles when you need them and build your own bespoke collections.

Librarian Self-service

Librarians can now instantly purchase titles directly via Cambridge Core using the Self-service 'add to basket' functionality. To find out if this service is available in your territory, or to set this up, please contact your sales representative.

Journal and journal archive purchasing models

Transformative Agreements

Transformative agreements provide an opportunity for institutions to transform their publishing output to gold open access in a sustainable manner. Participating institutions are granted subscription access to journals included in their collection. Corresponding authors at participating institutions can then use an APC discount or waiver when publishing in hybrid and/or gold OA journals also in their collection. Over time, a customer will see more of their collection become gold OA and will publish more gold OA as a result of this deal too. This naturally transitions revenue away from reading and towards publishing. Hence why these deals are known as transformative; they transition both spend and output to gold OA. Also known as: Read & Publish, OA Publishing Agreement

Subject collections

Various journal titles are available in a Full Package; a Humanities and Social Science (HSS) Package; a Science, Technology and Medicine (STM) Package; or in smaller subject-based packages. Individual journals may be omitted from some packages if required. We also offer a number of flexible online journals packages.

Traditional subscriptions

Subscriptions are available to most Cambridge journals in Print + Online, Print Only and Online Only formats, although an increasing number of journals are only available online.

Cambridge Journals Digital Archive

The *Cambridge Journals Digital Archive (CJDA)* is available with perpetual access for a one-time fee, or through annual lease. Collections can be tailored to your individual requirements and range from the complete archive right through to individual journal archives. You can also use EBA to purchase your most popular archives*.

* Please note, this is only available as part of an EBA in certain regions. For more information, please contact your usual Cambridge colleague, or use the details on the back of this catalogue.
