Enhanced Designated Engineering
Increase productivity and empower your IT staff

Comprehensive technical expertise supported by the full resources of Microsoft

Maximize the value of your technology with proven counsel and knowledge transfer for the technologies most important to you. As part of the engagement, Microsoft experts become an integrated part of your team. Your IT staff receives expert training while you maximize the value of your Microsoft IT investment.

Work side-by-side with engineers to create a vision, define execution, optimize important technologies, and see the plan through. We evaluate your environment, look for risks, and identify recurring problems with the goal of preventing future issues.

Comprehensive guidance and expertise

EDE imagines and realizes the art of the possible. By combining your unique environment and business goals with deep knowledge of Microsoft technologies, together we develop and implement an effective plan for your continued success.

Attain your desired state with
Enhanced Designated Engineering

Assess and envision

Expert environment assessment and visionary planning

Your Microsoft expert is part of your team and assesses your needs and environment to create a successful vision of capabilities and potential technology to support desired business outcomes.

- Evaluate business and technical requirements, focus on priorities and key initiatives
- Create future vision based on your organization's needs and outcomes
- Solve problems proactively to optimize technology

Define and implement

Envision your future state and follow an action plan

Our integrated approach focuses on overcoming challenges through quality of delivery. Work with your Microsoft expert to define an effective delivery plan, aligning goals to attain the desired outcome.

- Define goals and create delivery plan
- Align initiatives to priorities
- Guide architecture design and supportability review

Attain and adopt

Reach the optimal productivity state and gain skills for your team to maximize value

Attain your outcomes through operational optimization and skills development. Maximize value through targeted knowledge transfer to empower IT staff with increased skills and independence. Measure future success through ongoing iterative service delivery.

- Optimize and maximize operations to attain value
- Develop capabilities and skills
- Create an integrated continuous cycle of success
