

Designated Engineering

Pre-packaged services that focus on a single workload delivered with expert advisory over the course of a few months

Employee Experience

Keep your employees connected to help them do their best work

With hybrid and remote work, it's important to keep your employees connected. Microsoft Viva, our employee experience platform, allows you to help people and teams do their best work using the technology and experiences they rely on every day to connect, collaborate, and get work done from anywhere.

Business focus

Viva Connections

Promote communication across the workplace from a central location.

Viva Topics

Expedite learning, connections, and innovation by making information easier to find.

Viva Engage

Improve productivity and engagement by empowering teams to be their best from anywhere.

Viva Learning

Drive learning within your organization by making it a natural part of the day.

Drive outcomes

Your priorities

Increase awareness of Microsoft Viva functionality among different departments like change management, learning and development, and IT.

Seamlessly share information through a hybrid work model.

Improve and modernize communication, engagement, and learning methods.

Outcomes we deliver

Develop a plan to leverage Microsoft Viva within your organization.

Maximize your ability to inform, engage, and connect with your organization by creating a hybrid and modern workspace.

Enhance productivity and engagement by bringing communication, knowledge, learning, and insights into an integrated experience.

Overview of services

On-demand assessment— Microsoft 365 SharePoint: Remote engineer

Assess your Microsoft 365 tenant readiness for Viva implementation against Microsoft recommended practices.

WorkshopPLUS—Journey to Microsoft Viva Topics

Gain knowledge of Microsoft Viva Topics and the underlying AI processes involved in order to successfully configure and administer Microsoft Viva Topics within your organization.

Activate—Viva Connections and modern intranets

Learn key concepts that will be a starting point for your digital transformation to modern workplace solutions development using Microsoft 365 capabilities.

Overview of services

Description of services that can be included in your Designated Engineering package

Your Microsoft account team will assess your organization's business and technology goals and design a specific package of services tailored to your needs.

Assess and guide

Viva Glint Survey Advisory & Adoption

Help your organization with strategic support, program management, platform optimization, best practices and coaching. Work closely with a Customer Experience Program Manager to successfully execute on your People Success programs.

Configure and deploy

Viva Glint Deployment and Initial Two Survey Launches

Gain help with the deployment and launch of two surveys on Viva Glint. A Solutions Architect will support your organization in configuring and launching your initial Viva Glint programs with best practices tailored to your organization's needs. Support is provided for up to four weeks after each survey close.

Viva Glint Next Three Survey Launches

Get help with the launch of three additional surveys on Viva Glint. A Solutions Architect will support your organization in configuring and launching your Viva Glint surveys with best practices tailored to your organization's needs.

Optimize

Viva Glint Post Survey Platform Optimization

Get help with optimal platform utilization based on your specific organizational needs.

Platform optimization may include the following:

- Retroactive data or hierarchy updates following a survey launch.
- Updated attribute values, used when attribute values were entered incorrectly (misspelled) or if there are full changes in attributes such as new divisions that are being consolidated.
- Discovery around your technical support need and execution for up to four weeks after survey close.

Viva Glint Platform Optimization – Additional Support

Get help with one additional day of platform optimization support beyond the post-survey platform optimization included in the Customer Experience and Deployment DE package based on your specific organizational needs. Platform optimization may include the following:

- Retroactive data or hierarchy updates following a survey launch.
- Updated attribute values, used when attribute values if there is misspellings or significant changes such as consolidating new divisions.
- Advisory or management for historical imports.
