

Integration Partner Overview

Part of the Infor Human Capital Management (HCM) suite of solutions, **Infor LMS** is a robust end-to-end solution designed to help with creating, delivering, and reporting on learning throughout an internal and extended organization. Its goal is to help accelerate the rate at which organizations can help employees achieve their full potential by learning how to improve various business skills, which can contribute directly to the success of the company. Integration with LinkedIn Learning allows access to more flexible training options for joint customers, who can access LinkedIn Learning content through their Infor LMS solution.

Benefits of Integration

- Enables learners to **access their LinkedIn Learning content** directly within their LMS
- **Reduces manual effort by admins** to upload courses from LinkedIn Learning to their LMS
- Ensures learners always have **the latest LinkedIn Learning content** as soon as it's released
- **All learner activities** are recorded directly and automatically into their LMS

Features Included with Integration

Authentication	Content		Reporting	
LMS as SAML IdP (ie. as SSO)	Automatic Content Sync	Language Support	xAPI	AICC Reporting
No	Yes	English	No	Yes

- **Automatic Content Sync** - Your LMS will automatically receive new LinkedIn Learning content within 24 hours of its release. All content titles and descriptions are indexed to accommodate keyword searches and support efficient discoverability.
- **Language Support** - LinkedIn Learning has two different language license types: 1) *English* - only English content from LinkedIn Learning is supported for this LMS partner, and 2) *All-languages* - all available language content from LinkedIn Learning is supported.
- **AICC Reporting** - Your LMS can serve as a single source of truth for LMS-initiated learner activity tracking and reporting. AICC reporting includes course progress (%) and completion status.
