Known Limitations

Introduction

DOCA `dpa-statistics` is a CLI tool which allows users to monitor and obtain statistics on thread execution per running DPA process and thread. The tool is used to expose information about the running DPA processes and threads and to collect statistics on DPA thread performance.

The tool presents performance information for running DPA threads, including the number of cycles and instructions executed in a time period. The tool enables initiating and stopping collection of statistics and displaying the data collected per thread.

Info

The process ID output of the `dpa-ps` tool may be used as the input parameter for the `dpa-statistics` tool.

Info

This tool is supported for NVIDIA® BlueField®-3 only.

Collecting Performance Statistics Data

The command `collect` works on four mutually exclusive modes:

- Enable mode – start collecting performance data
- Disable mode – stop collecting performance data
- Timeout mode – start collecting, wait with a timeout, stop collect and print info. User could break the wait with Ctrl-C command and then the timeout will be canceled and tool will disable statistics collection and prints the info with the actual time of the collect operation.

- Infinite mode – no special flags. Same as timeout mode but with infinite timeout. The tool awaits the Ctrl-C command to stop.

The following table lists the `collect` command's flags and arguments:

Short Option	Long Option	Description
<code>-h</code>	<code>--help</code>	Help information
<code>-d</code>	<code>--device</code>	Device interface name (MST/RDMA)
<code>-p</code>	<code>--process-id</code>	Hexadecimal process ID for filtering Info This flag indicates a specific command for the command to operate on. Otherwise, statistics are collected from all processes.
<code>-i</code>	<code>--suppress-header-info</code>	Suppress print header info
<code>-n</code>	<code>--enable</code>	Enable collect info
<code>-o</code>	<code>--disable</code>	Disable collect info
<code>-t</code>	<code>--timeout</code>	Enable collect, wait with timeout, disable collect and print info Info Timeout value is in milliseconds. Examples for inputting timeout value: <ul style="list-style-type: none"> • 45 – 45 milliseconds

Short Option	Long Option	Description
		<ul style="list-style-type: none"> • 45.55 – 45 milliseconds and 550,000 nanoseconds • .0005 – 500 nanoseconds • 45m55n – 45 milliseconds and 55 nanoseconds • 66n – 66 nanoseconds
<code>-r</code>	<code>--reset</code>	Reset counters before operation starting collect operation

Presenting Statistics List

Presenting performance statistics is applicable after initiating data collection.

The following table lists the `show` command's flags and arguments:

Short Option	Long Option	Description
<code>-h</code>	<code>--help</code>	Help information
<code>-d</code>	<code>--device</code>	Device interface name (MST/RDMA)
<code>-p</code>	<code>--process-id</code>	Hexadecimal process ID for filtering
<code>-i</code>	<code>--suppress-header-info</code>	Suppress print header info

Output example:

```
$ sudo ./dpa-statistics show -d mlx5_0 -p 1
ProcessID      Process Name
  ThreadID    Cycles          Instruction      Time
Executions    Thread Name
1             PROCESS_1
  3           266268          18193            164
41            EH_1_0_0
  4           411571          32727            252
47            EH_1_1_1
```

Where:

- `ProcessID` – The `dpa_process_object_id` to which the thread belongs
- `Process Name` – The `dpa_process_name` to which the thread belongs
- `ThreadID` – DPA thread object ID
- `Cycles` – Total EU cycles the thread used
- `Instruction` – Total number of instructions the thread executed
- `Time` – Total time in ticks the thread was active
- `Executions` – Total number of thread invocations
- `Thread Name` – The `dpa_thread_name`

Examples

- Example of `collect` in infinite mode for process 0 with suppress header info:

```
$ sudo ./dpa-statistics collect -d mlx5_0 -p 0 -i
...^C
Data collected for 4606 milliseconds 0 nanoseconds
0          PROCESS_0
    5          223964          13754          140
31          EH_0_5_5
    6          190130          13754          114
31          EH_0_6_6
```

- Example of `collect` in timeout mode with a timeout of 1 second and half a millisecond.

```
$ sudo ./dpa-statistics collect -d mlx5_0 -t 1000.500
```

```

Data collected for 1000 milliseconds 500000 nanoseconds
ProcessID      Process Name
  ThreadID     Cycles           Instruction      Time
Executions     Thread Name
0              PROCESS_0
  5            223964           13754           140
31            EH_0_5_5
  6            190130           13754           114
31            EH_0_6_6
1              PROCESS_1
  3            266268           18193           164
41            EH_1_3_3
  4            411571           32727           252
47            EH_1_4_4
2              PROCESS_2
3              PROCESS_3
  0            223205           13754           137
31            EH_3_0_0
  1            189896           13754           113
31            EH_3_1_1
  2            191796           13754           117
31            EH_3_2_2
4              PROCESS_4

```

- Example of enabling statistics collection with reset of counters.

```
$ sudo ./dpa-statistics collect -d mlx5_0 -n -r
```

- Example of disabling statistics collection.

```
$ sudo ./dpa-statistics collect -d mlx5_0 -o
```

Known Limitations

- Reading large statistics counter blocks takes a long time
- The `dpa-ps` and `dpa-statistics` tools cannot be run at the same time on the same device

Notice

This document is provided for information purposes only and shall not be regarded as a warranty of a certain functionality, condition, or quality of a product. NVIDIA Corporation (“NVIDIA”) makes no representations or warranties, expressed or implied, as to the accuracy or completeness of the information contained in this document and assumes no responsibility for any errors contained herein. NVIDIA shall have no liability for the consequences or use of such information or for any infringement of patents or other rights of third parties that may result from its use. This document is not a commitment to develop, release, or deliver any Material (defined below), code, or functionality.

NVIDIA reserves the right to make corrections, modifications, enhancements, improvements, and any other changes to this document, at any time without notice.

Customer should obtain the latest relevant information before placing orders and should verify that such information is current and complete.

NVIDIA products are sold subject to the NVIDIA standard terms and conditions of sale supplied at the time of order acknowledgement, unless otherwise agreed in an individual sales agreement signed by authorized representatives of NVIDIA and customer (“Terms of Sale”). NVIDIA hereby expressly objects to applying any customer general terms and conditions with regards to the purchase of the NVIDIA product referenced in this document. No contractual obligations are formed either directly or indirectly by this document.

NVIDIA products are not designed, authorized, or warranted to be suitable for use in medical, military, aircraft, space, or life support equipment, nor in applications where failure or malfunction of the NVIDIA product can reasonably be expected to result in personal injury, death, or property or environmental damage. NVIDIA accepts no liability for inclusion and/or use of NVIDIA products in such equipment or applications and therefore such inclusion and/or use is at customer’s own risk.

NVIDIA makes no representation or warranty that products based on this document will be suitable for any specified use. Testing of all parameters of each product is not necessarily performed by NVIDIA. It is customer’s sole responsibility to evaluate and determine the applicability of any information contained in this document, ensure the product is suitable and fit for the application planned by customer, and perform the necessary testing for the application in order to avoid a default of the application or the product. Weaknesses in customer’s product designs may affect the quality and reliability of the NVIDIA product and may result in additional or different conditions and/or requirements beyond those contained in this document. NVIDIA accepts no liability related to any default, damage, costs, or problem which may be based on or attributable to: (i) the use of the NVIDIA product in any manner that is contrary to this document or (ii) customer product designs.
