

Calendar Integration

How to View a Site's Scheduled Visits in your External Calendar

Do you want to be able to see your existing appointments and your patient visits made in StudyTeam all in one place? After connecting and subscribing, visits scheduled in StudyTeam will appear as an additional calendar subscription in your external calendar interface. Save time by gaining visibility into scheduled visits without having to log into StudyTeam!

StudyTeam Integrated Visi										

With this feature you can:

- View visits scheduled in StudyTeam on multiple calendar platforms, including Google, iCloud, Office365, Exchange, and Outlook.
- View all relevant information for each visit. The Trial Name, Site Name, Subject ID, Assignees, and Location will all be shown without disclosing any Patient Identifying Information.
- Use filters to control which visits you want to be shown.
