Item:

CODESYS Virtual Control SL

Item number:

Requires application-based licenses

Sales/Source of supply:

CODESYS Store
<https://store.codesys.com>

Included in delivery:

CODESYS package, which contains the runtime system as a Debian package and as a container image.

System requirements and restrictions

Programming system	CODESYS Development System V3.5.20.10 or higher
Runtime system	CODESYS Virtual Control SL V4.12.0.0 or higher
Supported platforms	Debian Linux, RedHat Enterprise Linux, Yocto Linux CPU: x86-64, ARM, ARM64
Additional requirements	Support of a container engine required (Docker/Podman) Kernelversion >= 5.10 (Debian 11 - OSADL-Dockerimage) Python3, SSH Server vorinstalliert Network license server available (CODESYS LicenseServer) Optimization of realtime capabilities of the system: Hardware, BIOS, RT-Preempt-Kernel, no graphical UI
Limitations	No support for WSL (Windows subsystem for Linux) based systems
Licensing	

Application based license: The CODESYS Control SL runtime system can be licensed with an application-based license.

The license is activated on a software-based license container (soft container) that is permanently bound to the device. Alternatively, the license can be stored on a CODESYS key (USB dongle).

Note: The licensing is done through the application based licenses

Required accessories	CODESYS LicenseServer for Linux SL
