

Honey, I shrunk the backlog

Allan Kelly

Audience participation time

<https://www.allankelly.net/book-draw/>

Do you have a Product Backlog? – Hands up

- Keep your hand up if...
 - Your backlog will be done this quarter?
 - Your backlog will be done this year?

<https://www.allankelly.net/book-draw/>

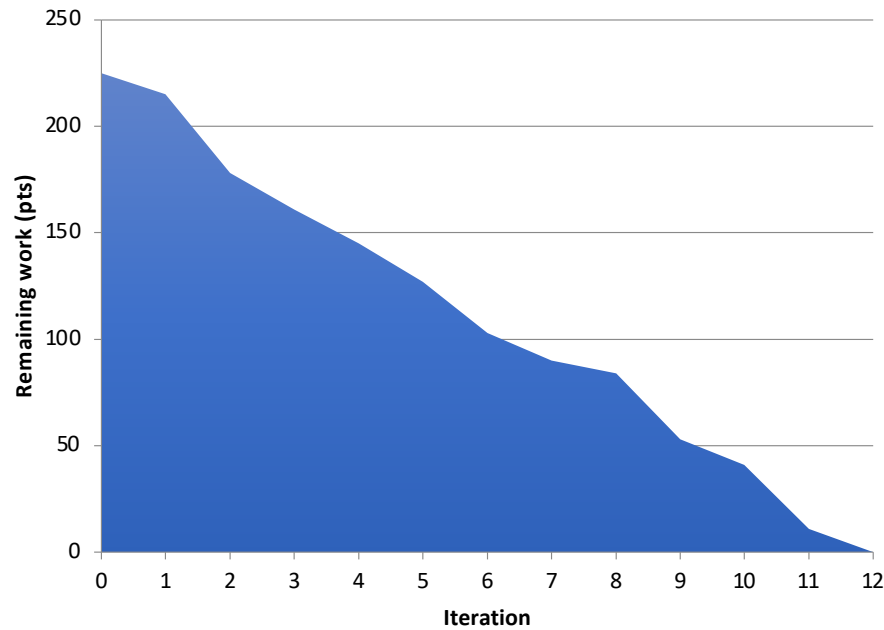

Who can tell me...

- Your team's velocity?
 - e.g. how fast your are doing backlog items
- Your backlog growth rate?
 - % growth on average each month

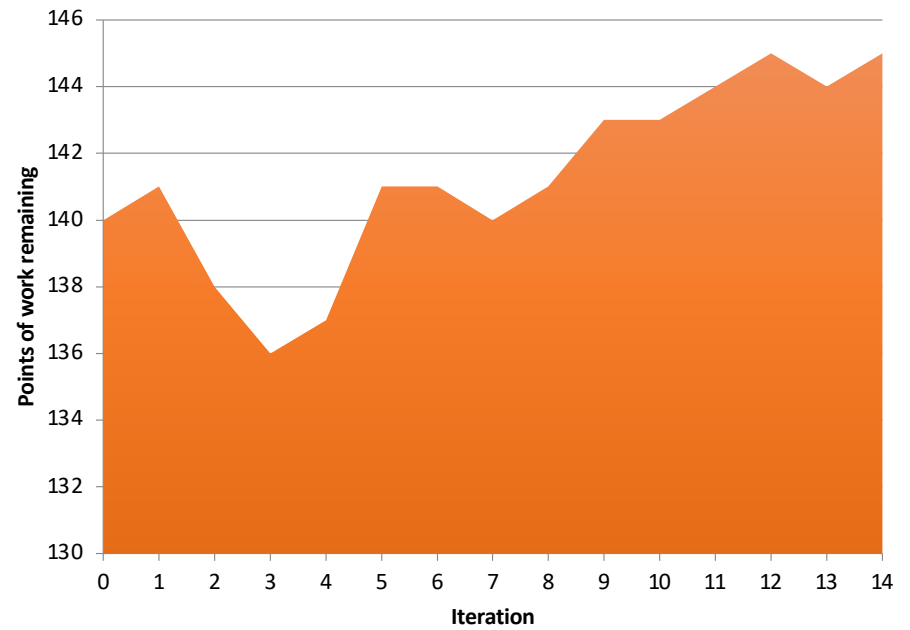

Backlogs....

Should look like this

Usually look like this

Spoiler...

<https://www.allankelly.net/book-draw/>

Nuke the backlog

*You have nothing
to lose but your
burndown charts*

We should ...

- Stop global warming
- Feed the world
- Create world peace
- Do everything in the backlog

Road to hell is paved
with good intention

Backlogs are comfort object
transient objects

*Time to let go of
childish things*

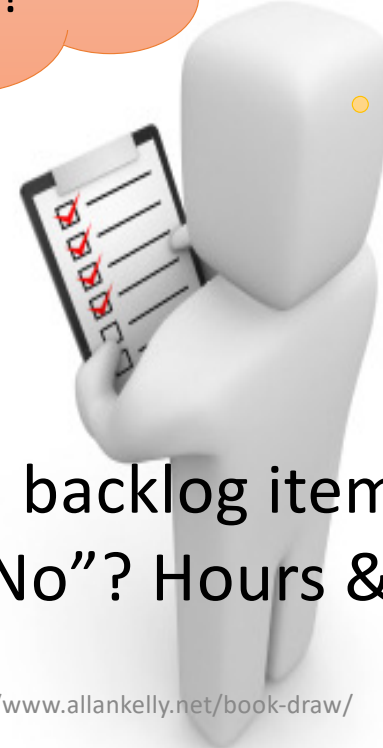

<https://www.allankelly.net/book-draw/>

Hey, there is a feature I really need in your product

Great ... I wonder how long I'll have to wait?

Thanks for your ideas, I've added them to the backlog

He'll be lucky

Cost of adding a backlog item? ~\$0

Cost of saying "No"? Hours & hours, \$thousands

6 months later...

How you doing with that backlog item I asked for?

I'm starting to lose trust in those guys

Sorry, we've not forgotten it, its still there, priorities you know...

It hasn't made it to the top in 6 months so it probably never will

Marooned backlog items corrode trust

Our problem is not having ideas for backlog items

Problem #1 is delivering the backlog

Problem #2: meeting backlog expectations

Backlogs don't scale

Backlogs work well in the small
e.g. Sprint backlogs & near future (weeks)

The backlog, a bottomless pit

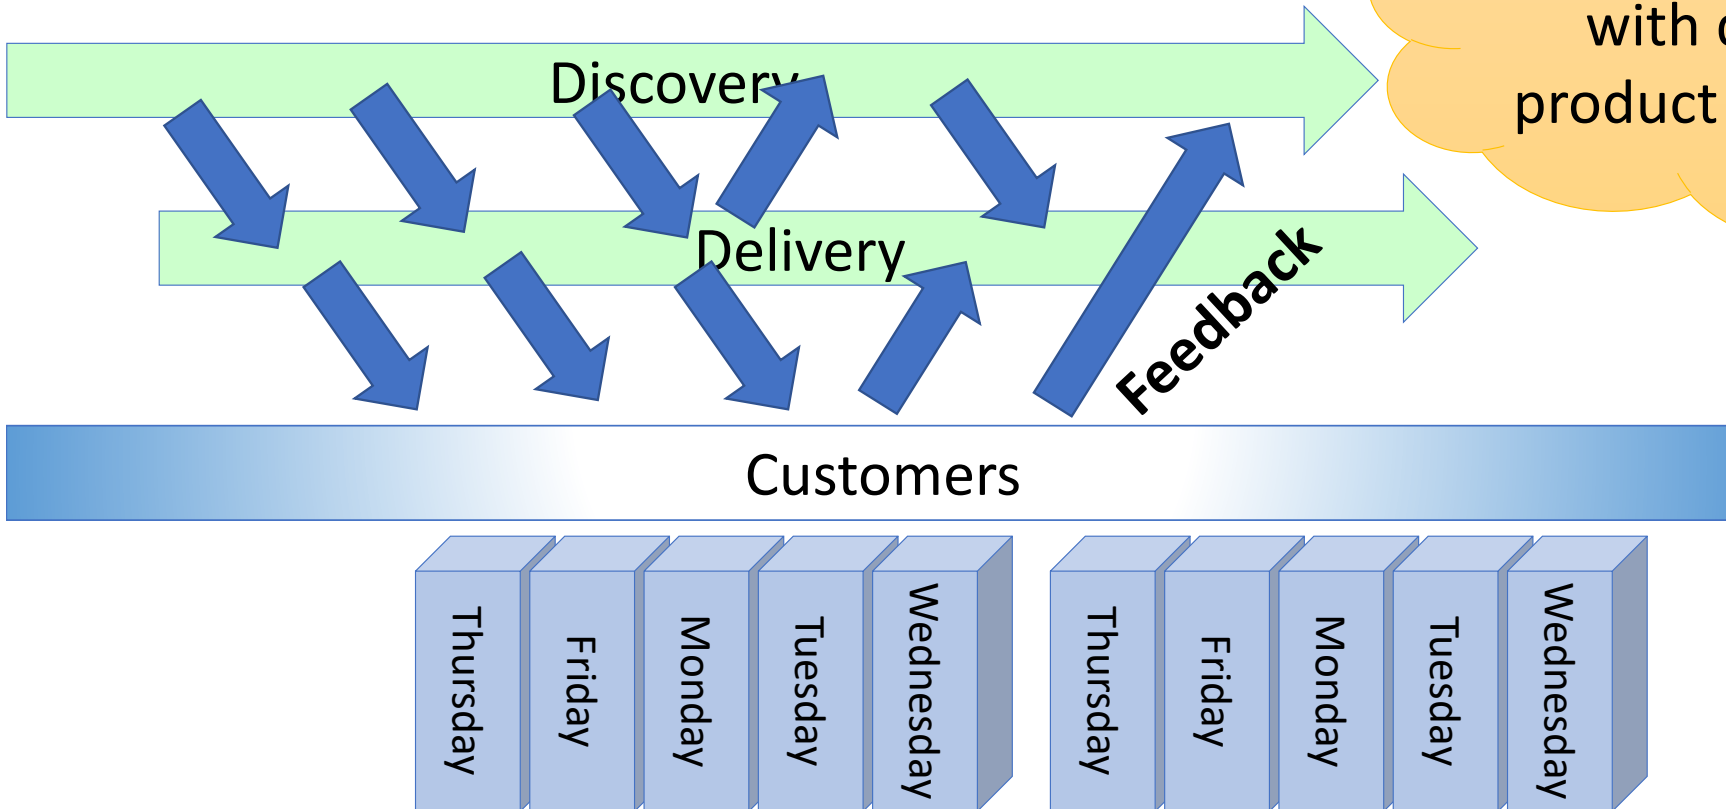

<https://www.allankelly.net/book-draw/>

And the new stuff...

<https://www.allankelly.net/book-draw/>

Dual-track Agile with discovery

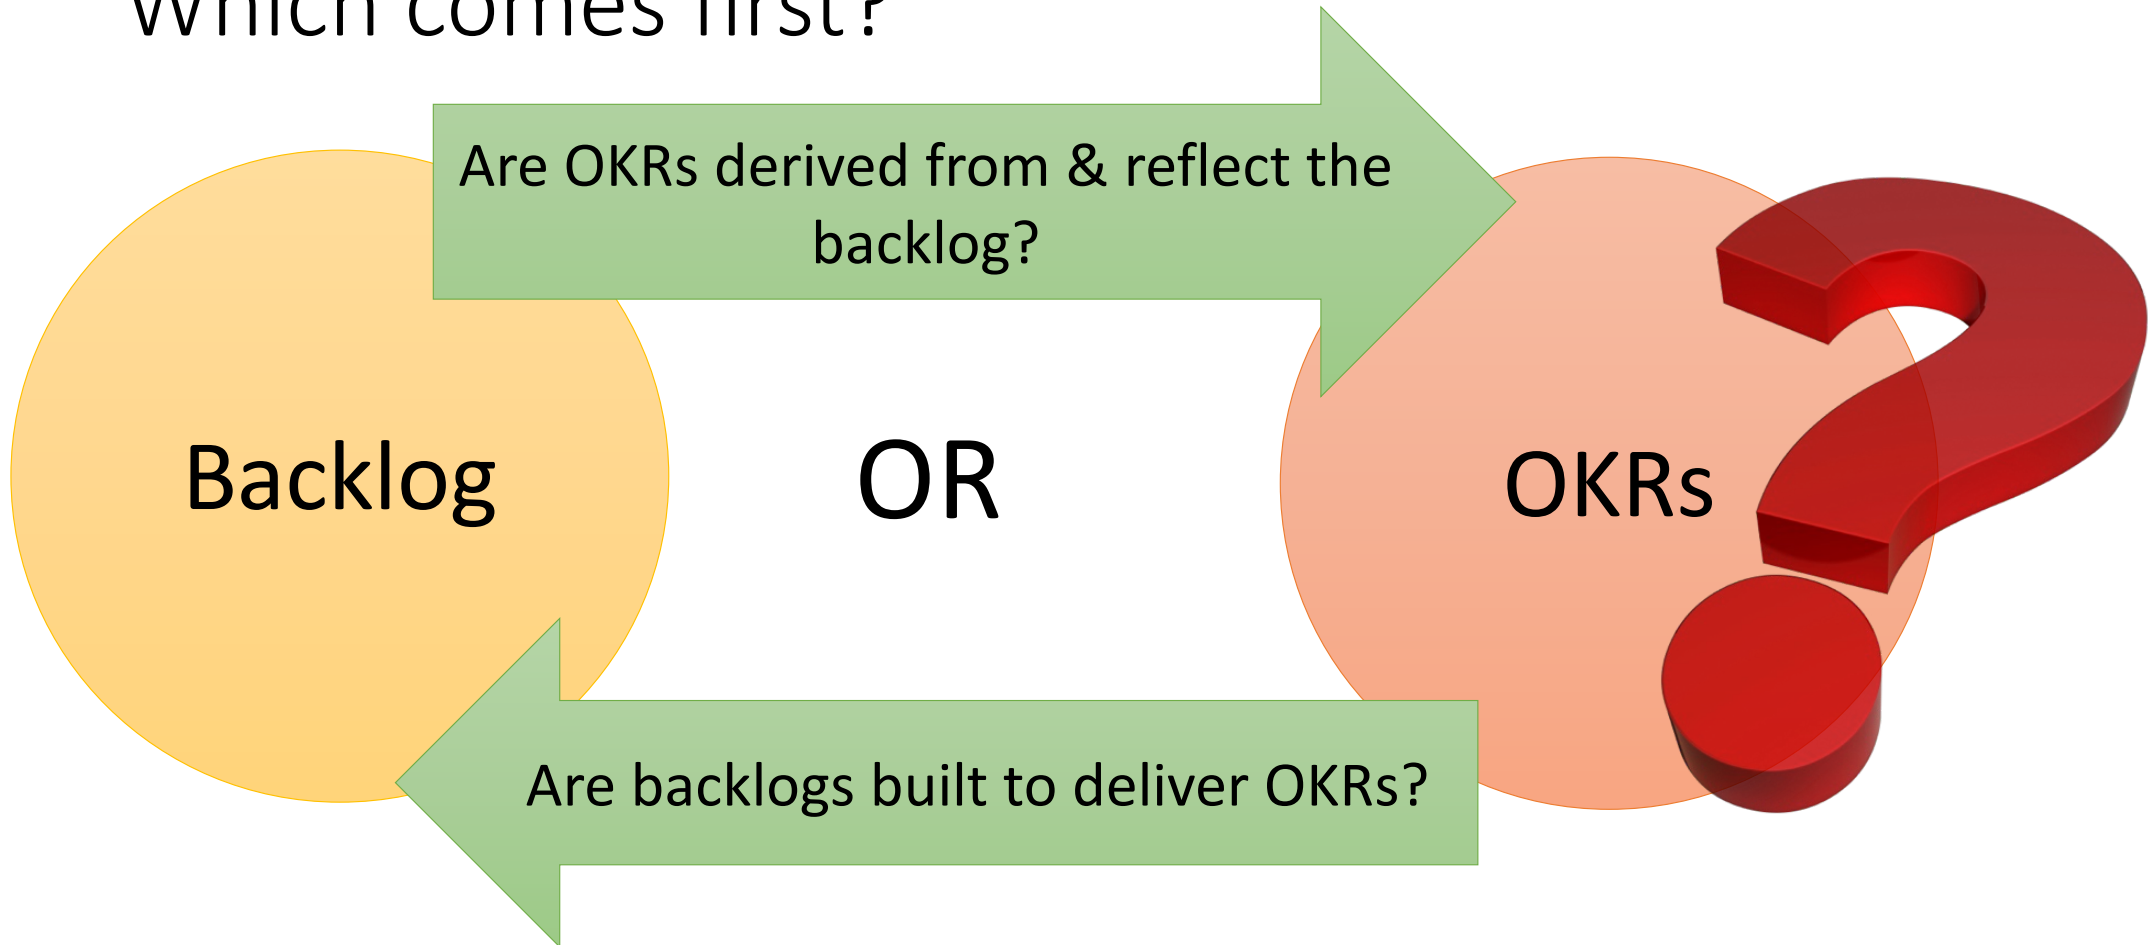

How does an existing backlog fit with dynamic product discovery?

And OKRs...

Objectives and key results

Which comes first?

Thought experiment

*What would you do if you
lost your backlog?*

Life without a (product) backlog

<https://www.allankelly.net/book-draw/>

Day-1

amazon

The Amazon logo, featuring a thick orange arrow that curves from the bottom of the letter 'a' to the bottom of the letter 'z', pointing to the right.

<https://www.allankelly.net/book-draw/>

Purpose

Level 1 goal

Why does this company exist?
How do we benefit society?

True North

Mission(s)

Level 2 goals

What is our mission?
1 company mission or,
multiple missions & teams

Level 3 Goals

- Reset every 3 months
- Nuke the backlog
- Re-assert missions
- Start again, day-1

<https://www.allankelly.net/book-draw/>

Replace backlog with a

Just-in-Time story generator

Lead with:

- Purpose
- Mission
- True North

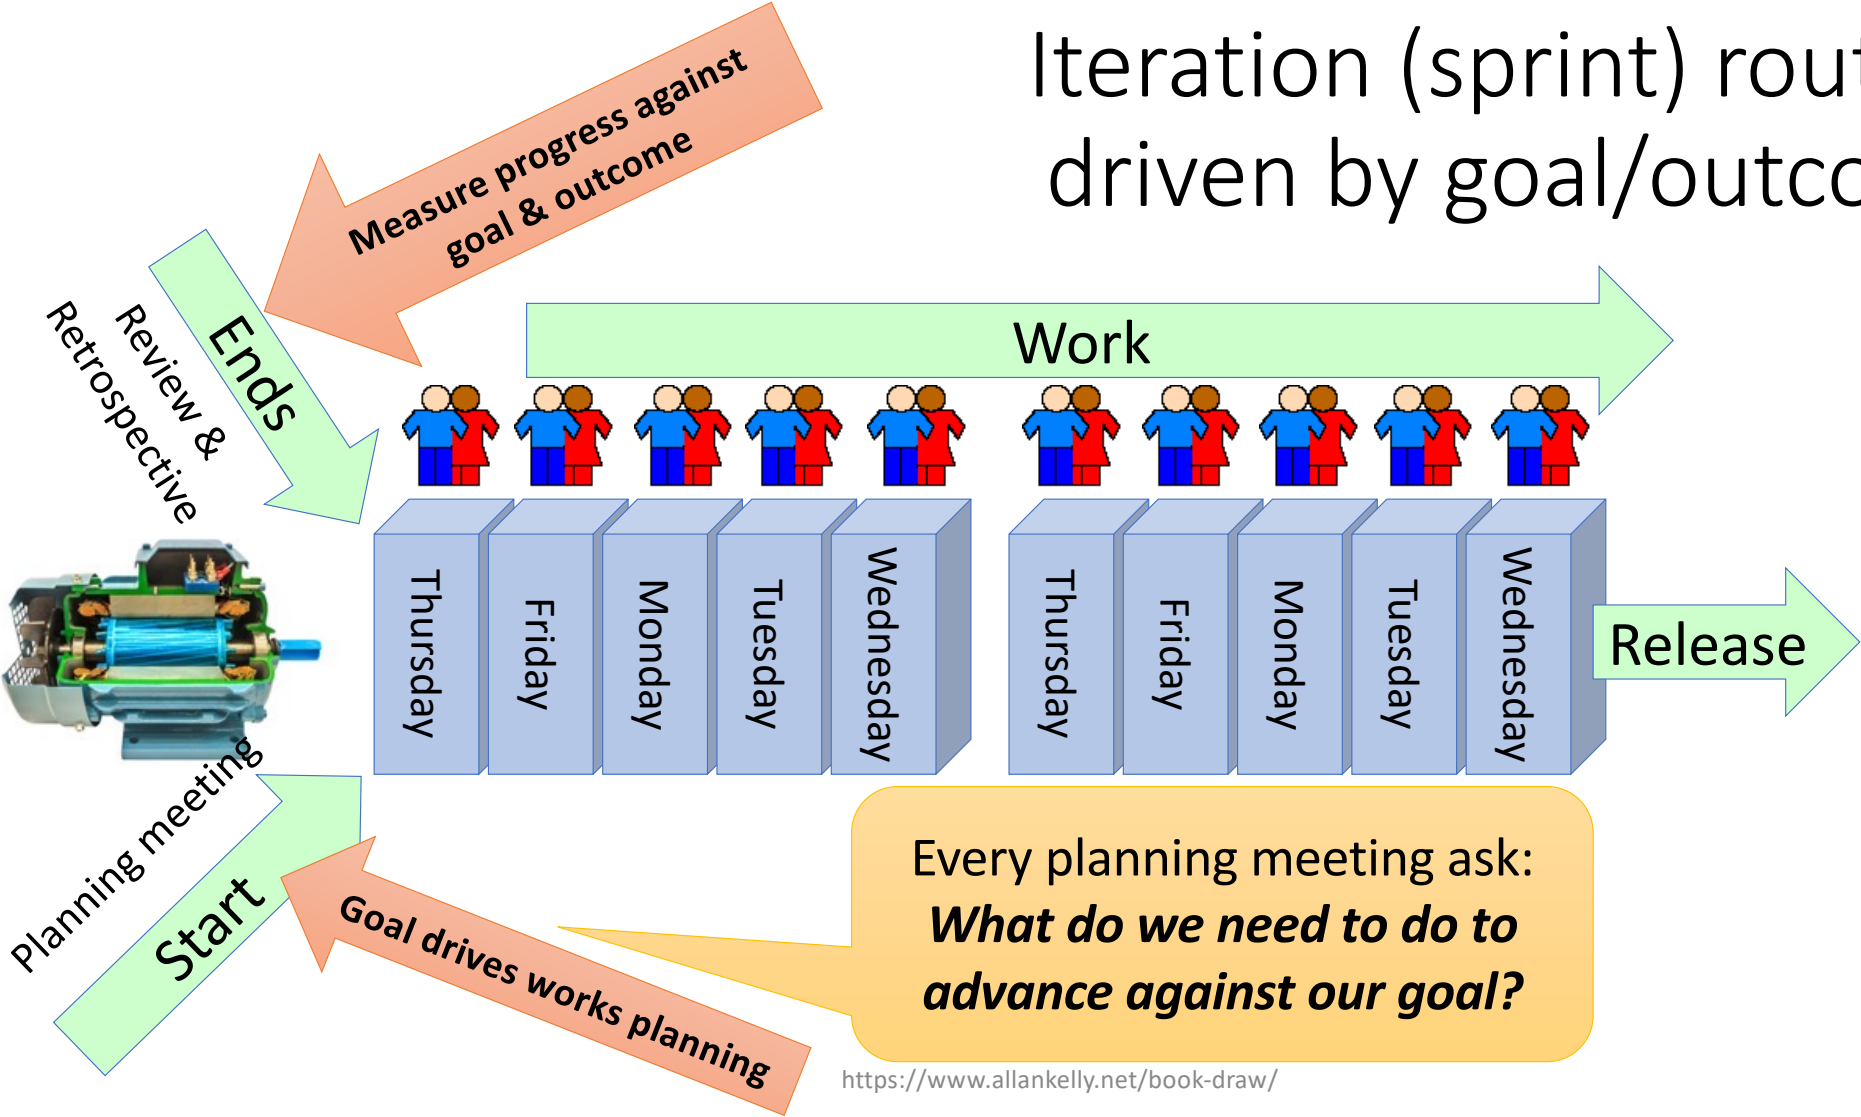

Implement with:

- OKRs
- Product Goals
- Day-1 thinking
- Jobs to be done

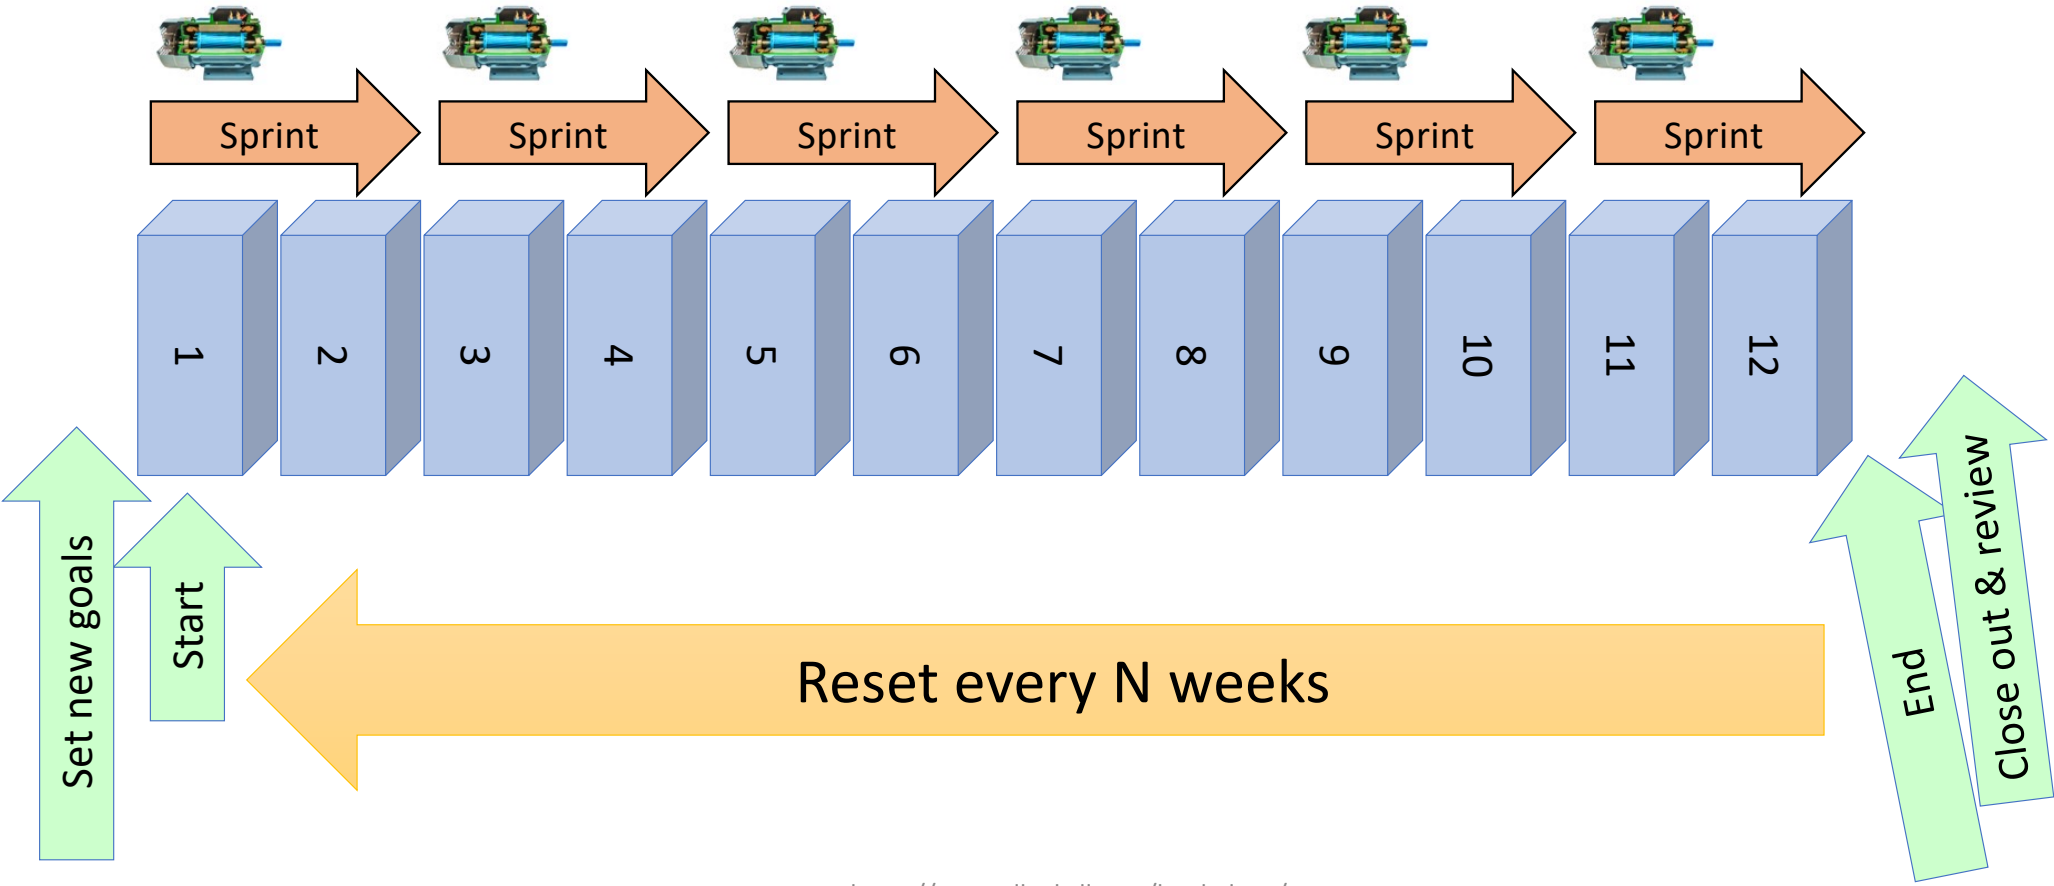

Create the stories that advance you towards your goals

Iteration (sprint) routine driven by goal/outcome

<https://www.allankelly.net/book-draw/>

Super Cycle

Work within timeboxes

Ask not:

How long will it take?

<https://www.allankelly.net/book-draw/>

Ask:

What can we do in the time we have?

- This week
- 2-week sprint
- 3-month quarter

Lead with Goals

Work follows goals

Goals follow strategy

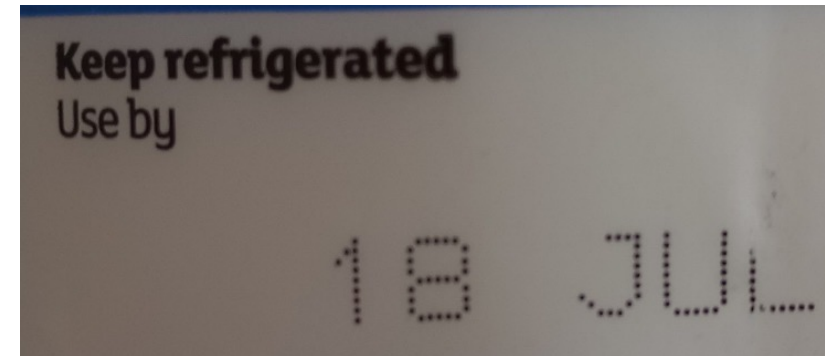

Focus on goals, and little else

Objective Driven Agile

ODA

Until you *Nuke the Backlog*...

1. Put “good ideas” somewhere else
 - Create a separate list of things which are worth remembering and which you might do in future
2. Write an expiry/use-by date on any item which does go in the backlog
 - Items will naturally time out
3. Set objectives & be guided by objectives over backlog
 - Every 10 weeks rewrite objectives
 - Scrum people: emphasis Product Goal & Spring Goal over backlog
 - Work with objectives and let the backlog fade away

Goals over backlog *Objective Driven Agile*
