Subject: Lack of transparency, misuse of public funds and assurance of sound management in European institutions

Concerning information recently came to light regarding serious irregularities committed by the Commission, which allegedly distributed public funds to environmental lobbies to advocate for its own 'green agenda'.

1. What measures has the Commission taken or does it intend to take to investigate and address the identified irregularities, including holding those responsible for improper or illegal practices accountable?
2. What specific tools does the Commission have or plan to implement to ensure that similar situations do not occur in the future, and how does it intend to guarantee that the existing control and audit mechanisms are effective in preventing the misuse of public funds?
3. What steps will be taken to promote greater transparency and ensure that European citizens have access to clear and detailed information about the use of public funds?
