

PRODUCT SHEET

# Veeva Safety

Veeva Safety applications operate as a unified pharmacovigilance system on a single cloud platform to maximize operational efficiencies and improve patient safety.

Safety applications share a common data model which enables the end-to-end management of safety processes.

**Veeva Safety** is a global safety case intake, processing, and reporting system.

**Veeva SafetyDocs** manages safety-related content and processes including the pharmacovigilance master file, pharmacovigilance agreements, risk management plans and risk minimization measures, aggregate reports, literature articles, and safety signal investigations.

Veeva SafetyDocs	2019	Mature	11–50

PRODUCT SHEET

# Veeva Safety

Veeva Safety is a modern individual case safety report (ICSR) management system that manages the intake, processing, and submission of adverse events for clinical and post-marketed products.

Within one system, sponsors and CROs process and manage global and domestic adverse events for drug, biologic, vaccine, device, and combination products. Built-in gateway connections and reporting rules streamline submissions to health authorities and distributions to partners.

Central coding dictionary management automates semi-annual MedDRA, WHODrug, and EDQM updates.

<b>Announced</b>	2019
<b>Status</b>	Mature
<b>Customer type</b>	Enterprise Pharma, Biotech, CRO
<b>Customers</b>	51–100
<b>Platform</b>	Veeva Vault
<b>Integrations</b>	Lives with SafetyDocs Connected with Clinical Operations, EDC, RIM, and MedInquiry

PRODUCT SHEET

# Veeva SafetyDocs

Veeva SafetyDocs manages pharmacovigilance-related content and processes.

Improve compliance, enable collaboration, and increase efficiency in the management of pharmacovigilance system master files (PSMF), pharmacovigilance agreements (PVAs), risk management plans (RMPs) and additional risk minimization measures (aRMMs), aggregate reports, literature articles, and safety signal investigations.
