

# Plots for resolution paper

*Richard D. Morey*

*25 August 2016*

Some of this code was adapted from [https://github.com/jtleek/replication\\_paper](https://github.com/jtleek/replication_paper) (in particular, the data loading.)

How many total studies are we left with after cleaning?

```
## [1] 73
```

		Decision	
		Don't reject $H_0$	Reject $H_0$
State of nature	$H_0$ true	Correct decision $1 - \alpha$	Type I error $\alpha$
	$H_0$ false	Type II error $\beta$	Correct decision $1 - \beta$ Power

Power on top graph

```
## [1] 0.41
```

Power on bottom graph

```
## [1] 0.85
```

Value with 50% power

```
## [1] -0.2
```

$p$  value for observation

```
## [1] 0.0015
```

---

What proportion of the replications are in the prediction CI when we permute the results?

```
## [1] 0.54
```

What proportion of replications are in the prediction CI when we set all the original results to 0 effect size?

```
## [1] 0.81
```

What proportion of replications are in the prediction CI when we set all the original results to the same effect size of the replications, but with opposite sign?

```
## [1] 0.58
```

	Orig. N	Repl. N	Orig. r	Repl. r	Observed difference (Fisher's z)	SE of difference (Fisher's z)
a	32	48	0.46	0.13	0.36	0.23
b	186	280	0.17	0.04	0.13	0.10
c	564	3597	0.00	0.11	-0.10	0.05
d	14	19	0.72	0.21	0.70	0.38
e	8	8	0.86	0.12	1.17	0.58

How many 95% prediction intervals contain replication?

```
## [1] 51
```

How many 99% prediction intervals contain replication?

```
## [1] 65
```

How many 50% prediction intervals contain replication?

```
## [1] 17
```

How many prediction SE intervals contain replication?

```
## [1] 25
```

What is the median  $z$  score?

```
## [1] 1.4
```

What are the quartiles of the power at a difference of .3?

```
## 25% 50% 75%
## 0.19 0.29 0.60
```

These are the p values against the null.

```
## [1] 0.122 0.167 0.025 0.062 0.043
```

These are the p values against  $d \geq .3$ .

```
## [1] 0.604 0.039 0.000 0.853 0.929
```

Difference (correlation, original  $r=0$ )

True difference (correlation, original  $\rho = 0$ )

Difference (correlation, original  $r=0$ )

True difference (correlation, original  $\rho = 0$ )
